

# ESD SAFE DELRIN & ACETAL SMALL PARTS TIPS

# Vacuum Handling Tool Accessories

Our machined small parts tips are designed to be used with a continuous vacuum source for handling parts as small as .006" (.152mm).

## Small Parts Tips

These tips are designed for handling very tiny parts. Tips are available in ESD Safe Delrin plastic so there is no chance of static or mechanical damage. For a lower cost tip Non-ESD Safe Acetal is also available.

*These tips must be used with continuous vacuum systems only.*

- Beige Delrin - Static Dissipative temperature up to 212°F (100°C).
- White Delrin/Acetal - Non ESD Safe temperatures up to 212°F (100°C).

# HIGH TEMPERATURE SMALL PARTS TIPS

## Vacuum Handling Tool Accessories

### Small Parts Tips

These tips are designed for handling very tiny parts. High temperature Torlon for soldering applications, or Brass for general handling applications, all attached to a metal probe.

*These tips must be used with continuous vacuum systems only.*

- Olive Torlon - non ESD Safe temperatures up to 475°F (232°C).
- Gold Plated Brass - Conductive, gold plated temperatures up to 500°F (260°C).

Vacuum probes are available with or without attached vacuum cups, which will fit most of your handling applications. The luer slip connector fits all of our vacuum handling tools. Custom probe lengths and bends are available upon request.

### Here's a tip...

Cups can be cleaned easily with clean water or Isopropyl Rubbing Alcohol.
